No. 6. Income Tax and Social Services Contribution Payable on Incomes Derived by Individuals, 1964-65 to 1968-69

The Commonwealth Government is the sole authority in Australia levying income tax. In 1964-65, tax was imposed as a single levy called Income Tax and Social Services Contribution—from 1965-66, Income Tax only.

This table gives examples of the amount of tax payable on incomes derived by individuals in recent years. The "Actual Incomes" are amounts of income before any deductions of a concessional nature have been made. In calculating the tax payable, no allowance has been made for concessional deductions other than for the dependants indicated in the headings.

- On loans raised to meet a revenue deficit accruing after 30th June, 1927:

(a) Special deficit loans incurred in depression: 0.25 per cent. each by Commonwealth and State until 30th June, 1944, thereafter for 39 years 0.25 per cent. by Commonwealth and 0.75 per cent. by State.

4. Interest on cancelled securities at the rate of 4.5 per cent.
Additional contributions are paid by the State to recoup amounts appropriated from the Sinking Fund for discounts on conversions since November, 1936. The additional contributions are spread over the currency of the conversion loans, and the first payment was made in 1938-39.

These statistics relate to new capital raised by companies incorporated in Australia and the Australian Territories, distinguishing between companies listed on the Australian Stock Exchanges (*listed companies*) and all other companies (*unlisted companies*). *New money raised* is the net amount of cash transferred from the investing public to the companies, and consists of the total amount of cash received by the companies less the amounts not involving a transfer of funds from the investing public (cash subscribed by associated companies, and other cash subscriptions used to redeem shares, debentures, etc. or to purchase existing shares, debentures, etc. in other companies). Borrowings by bank overdraft and temporary advances, deposits accepted by banks, insurance and pastoral companies, and building societies, and loans to authorized dealers in the short-term money market are excluded from the statistics.

No. 41. Gross and Net Annual Inflow of Private Oversea Investment to Australia, by Domicile of Investor, 1957-58 to 1966-67

Note. The statistics in Tables 41 to 44 relate to the following annual flows of investment between Australia and overseas countries (including Papua and New Guinea):—

(a) direct overseas investment in companies in Australia (incorporated and unincorporated business);

(b) portfolio investment in companies in Australia by overseas investors;

(c) overseas investment in Commonwealth Government and local government and semi-governmental securities; and

(d) investment overseas by Australian businesses.

Other classes of investment (e.g. investment in real estate in Australia by non-residents other than companies included in the statistics, and loans by non-resident individuals to Australian individuals) are not covered by the figures. Inflows to Australia and outflows from Australia are shown net of withdrawals of investment. Investment income payable overseas is the amount payable out of profits earned by companies (other than life assurance companies) operating in Australia. Complete definitions of the terms used, and further particulars of investment flows, are given in *Annual Bulletin of Oversea Investment: Australia* issued by the Commonwealth Statistician. Many figures have been revised since last issue.

No. 59. General Insurance (a): Premiums, Claims, and Expenses in New South Wales, 1957-58 to 1967-68

Tables 59 to 61 contain selected items of statistics which conform substantially to the following definitions and should not be construed as "profit and loss" statements or "revenue accounts". Premiums represent the full amount receivable in respect of policies issued or renewed in the year, less returns, rebates, and bonuses paid or credited to policy holders in the year; they are not adjusted for premiums unearned at the end of the year and consequently the amounts shown differ from "earned premium income" appropriate to the year. When figures are increasing, premiums receivable (as shown) are greater than "earned premium income" appropriate to the year; the converse applies when figures are declining. Claims include provisions for outstanding claims and represents claims incurred in the year. Contributions to fire brigades, commission and agents' charges, and expenses of management mainly represent payments in the year. Taxation also mainly represents payments in the year, and the amounts included for income tax therefore relate to income of earlier years.

for income tax therefore relate to income of earlier years.
